The most popular Free PC and hard drive cloning utility - DriveClone video

"Businesses can immediately boot up from the Mirror Drive and retrieve data from up to 99 archives when disasters strike" - said Peter Lin.

IRVINE, CA, September 16, 2013 /24-7PressRelease/ -- FarStone today presents a free drive cloning solution for individuals and home users. Farstone's DriveClone (<http://www.farstone.com/software/drive-clone.php>) allows users to safely update their hardware and secure data protection through redundancy. DriveClone solution, serves over millions of computer cloning, is now free for non-commercial use.

"Many home users have to manually migrate their data during upgrades and have no or limited data backup," said Peter Lin, Product Manager, Data Protection and Recovery. "[Additionally] The new UEFI and SSD hardware configurations have made cloning data between hard drives and SSD very difficult". With new mirror drive technology, users can be assured that all their data are safely transferred and protected without having to deal with the exuberating migrating process.

DriveClone 10 Main Features:- Mirror Drive*- Hard Drive, SSD Cloning- Windows Cloning- Virtualization & Convert to VMware & Hyper-v- Incremental Cloning and File Version Backup- Universal Boot with Mirror Drive- Hard Drive Defrag- UEFI/GPT/RAID Cloning

Mirror Drive *Mirror Drive encapsulates all data from hard drives to a backup drive, and new data are quickly incremented and protected. Mirror Drive also keeps up to 99 historical data and files versions, allowing users to quickly retrieve any old data.

Pricing & Availability DriveClone is Free for non-commercial use. Welcome to download from FarStone website at: <http://www.farstone.com/software/Drive-Clone.php>
