

CAMAS, WA, September 17, 2013 **/24-7PressRelease/** -- CritterMap Software LLC, are an independent website and mobile software company that owns BackCountry Navigator Android GPS App. The company gives you the opportunity to explore the great outdoors beyond the limits of roads and cell coverage. This Android GPS app runs on both Android smartphones and tablets.

BackCountry Navigator Android GPS App record waypoints or tracks to see where you are and where you have been. This is a five star app that is highly recommended by people who loves backpacking, hiking, trekking, camping and even fishing. You need to download the topographic maps, it represents terrain using graphical contour lines, and they help in outdoor travel navigation.

To find a map for any location using Backcountry Navigator Pro, you must tap the menu button and then tap the Maps option. You can view the available map options for each region category such as the Worldwide, US and Canada, Western Europe, Southern Europe, Central Europe, Oceania as well as Microsoft Research Maps.

When going for an off-road trip, BackCountry Navigator Android GPS App is for you! They are great for travelers who are not good with reading maps, road signs or directions. Campers have found great use for this system because they can find their way about the wilderness without the use of a guide or a much complicated trail system.

This is really designed and launched for backcountry use. Everyone can appreciate the efficiency to find their way around and find anything and anyone if they go missing and that is why this Android app is getting to be so popular and most downloaded. Now, you can invade unfamiliar regions with confidence because you are assured you will never get lost. The GPS will help you get to your destination, whether it's to a panoramic vista, sweet mountain or your campsite.

BackCountry Navigator Android GPS App allows you to download free maps and save them on your SD card, which makes them accessible even when there is no network signal. You can view the region's coordinate and other data on the GPS, so there's no need for you to bring along many map printouts. The GPS app can help you determine the right path down the mountain. You can quickly check the receiver on the way down so that you can be warned of any danger zones.

Also, it gives you the choice to only download the part of the map you need. To download map tiles for offline use, switch the sculpt button and touch and drag a box to define one or more rectangles on the screen. Then, choose the map layer you prefer and the max zoom, then click download. You're ready to take adventure travel.

CritterMap Software is situated at Camas, Washington. The company aims to create software and content for a more enjoyable and unforgettable out of doors activities. The software was conceived by an adventure hobbyist with vast experience on both software engineering and earth navigation.
