DETROIT, MI, September 17, 2013 **/24-7PressRelease/** -- Accents Cosmetic Surgery & Medical Spa is pleased to announce that we now provide PrecisionTx - a new one-time laser procedure for patients who are bothered by underarm sweating.

[PrecisionTx](#) is a minimally invasive laser procedure that goes right to the source, underneath the skin and into the underarm sweat glands to safely remove them. This one-time, one-hour laser procedure is done in the comfort of Dr. Mark Berkowitz's office at Accents Cosmetic Surgery & Medical Spa with cutting-edge laser technology that provides desired outcomes with minimal downtime.

[LaserDry](#) is an incredible procedure that can change the lives of those who suffer from excessive, uncontrollable underarm sweating. It is reported that nearly 5% of the world's population suffers from frequent or persistent underarm sweating, but only a few of them are aware of LaserDry, PrecisionTx, and the other surgical ways to correct this irritating issue.

*Real life LaserDry patient Stacey Kozal from Montague, MI recently traveled over 6 hours round trip in order to have her procedure. She drove herself home and went to work the next day with no downtime or pain. The 33 year old has always noted sweating through her shirt, complaining that no antiperspirants have ever been able to do the trick. Kozel works outside in the hot climate, but within a week of undergoing a LaserDry treatment she has noticed a very clear improvement.*

At Accents Cosmetic Surgery & Medical Spa, we offer a comfortable and relaxed setting. A wide variety people, including Stacey Kozel, can receive LaserDry or a number of different services at our center, which is equipped with state-of-the-art technology in cosmetic enhancement and cosmetic correction. We are confident that you will leave our practice feeling better about your underarms. Overactive axillary sweat glands don't have to control you any longer. Cosmetic surgery and related procedures can and will provide improvement to your quality of life!
