

NEWPORT BEACH, CA, September 18, 2013 **/24-7PressRelease/** -- Pacifique LLC an innovative holistic health leader in natural and delicious nutrition, announced today the launch of NuBello, a vegetable based, nutrient dense protein meal replacement powder. NuBello is made without nuts, gluten, soy or dairy. Pacifique LLC is unveiling one flavor at launch, raspberry, and is planning to expand its offering to include vanilla and chocolate through crowd-funding platform, Indiegogo. NuBello is available for pre-order through Indiegogo through November 10th.

In the saturated marketplace of protein powders and meal replacements, NuBello makes room for innovation, while offering a low-cost, quick and easy natural source of vital nutrients. Keith Bashaw, a former Wall Street trader and currently enrolled in the Institute for Integrative Nutrition and Tracy Schroeder, an interior designer, were looking for a vegetable-based, natural and holistically sound, convenient and complete nutrition solution to meet the demands of their busy lives; not satisfied with the artificial, high-calorie and stimulant-loaded options available on the market, they began the journey to create a natural alternative that would deliver a pure, raw and sustainable source of energy, while helping reduce hunger to give busy people a low-cost, mineral-rich, convenient nutrition solution.

Bashaw explained, "We wanted to create a great food product that delivers what the brain and the body needs to function at its best at a reasonable cost. This is what NuBello does. We are proud of our achievement."

Pacifique LLC and Clerel Partners, Inc. are dedicated to bringing the finest whole food based supplement products to a community of health conscious individuals who care deeply about nutrition. Unhealthy choices, over medication and fast food are rampant in our society with devastating consequences to our health such as the rapid rise in obesity. NuBello was designed to counteract these negative trends and to afford everyone the choice of health. Choose wisely.
