

SANTA ANA, CA, September 19, 2013 **/24-7PressRelease/** -- IOMIC USA, manufacturer of innovative, revolutionary and dynamically designed grips, announced today that IOMIC Grips were used by the winner and second place finisher of the Japan LPGA Championship Konica Minolta Cup. Two top-ten finishers at the LPGA Evian Championship also used IOMIC grips. IOMIC grips have now been played by the winners of 40 worldwide tour events in 2013.

According to Katz Murai, Overseas Division of IOMIC, "The revolutionary technology of our grips is designed to provide great feel and control which is an added benefit during wet weather conditions such as those experienced on several tours this past weekend. We congratulate the winner of the Japan LPGA Championship Konica Minolta Cup and the top-10 finishers who used IOMIC grips this past week."

The winner of the Japan LPGA Championship Konica Minolta Cup shot an 11-under-par 201 to end up in a playoff that lasted six holes on Sunday. The final round was washed out by bad weather and thunderstorms, but there was enough of a break in the weather to complete the playoff. The winner used IOMIC Sticky Vivid and X-Grip Vivid grips. The second place finisher used IOMIC Sticky 1.8 grips.

The second place finisher at the Evian Championship in France finished the rain-shortened, 54-hole tournament with an 8-under-par 205 total. She uses IOMIC Art Grip Series X-Grip Opus1 and Sticky Opus2 grips. A T6 finisher at this event also used IOMIC grips.

IOMIC Sticky grips are incredibly soft, and feature great traction and low torque. These versatile grips are suitable for all playing styles, from beginners to top ranked tour professionals. The Sticky 2.3 is the standard size grip in the Sticky series while the Sticky 1.8 is slightly smaller. Both grips are available in a wide variety of colors.

The X-Grip is IOMIC's first grip offering. This original standard size grip has a unique pattern of crosses and diamonds which helps golfers grip the club with the perfect amount of pressure. It prevents the grip from twisting at a high swing speed and gives players superior contact and a firm feeling.

IOMIC Art Grip Opus grips are manufactured using IOMIC's special marble coloring process to create a stylish, fresh new look. X-Grip Opus1 grips are a fusion of two colors in a marble design creating a unique pattern on each grip. Sticky Opus2 grips are incredibly soft, and feature great traction and low torque. These grips are available in a variety of body colors with a

white marble design.

All IOMIC grips feature the revolutionary "IOMAX" technology, a proprietary compound that provides a soft feel with control. This material provides adhesiveness, is water and friction resistant and is naturally white in color which allows for a full spectrum of color - IOMIC's signature trait.

About IOMIC USA:

IOMIC USA manufactures premium, ergonomically designed golf grips that focus on technology. The company uses a revolutionary material called "IOMAX", which enhances grip feel, reduces torque and allows for a variety of color choices. The ergonomic design of IOMIC grips, combined with a super soft touch and feel, ensure maximum feedback and control for golfers. The launch of the Color Grip Series helped the company gain attention in the industry for the wide variety of colors offered. This led to the development of the Art Grip Series, the industry's first ever marbled grip. IOMIC grips are in the bags of many top professional and amateur golfers worldwide. For more information about the company please visit <http://www.iomicusa.com>.
