

SAN RAMON, CA, September 20, 2013 **/24-7PressRelease/** -- LiveTracGuardian announced the availability of an advanced GPS tracking unit suitable for all passenger vehicles and light duty trucks (built since 1996) that connect via the On Board Diagnostics port of the vehicle. This product is available for shipping immediately and provides GPS tracking as well as several advanced features including fuel consumption monitoring, mileage monitoring, and vehicle diagnostics messages generated by the Onboard Diagnostics Port and tamper detection. All of this at the lowest cost in North America.

"The OBD GPS tracking unit is a state of the art product that combines several advanced features at an unbeatable price" says Thomas Van Demark, Director of Media Relations at LiveTracGuardian. "Our offering is the lowest costing solution in North America. The device is suitable for all passenger vehicles and light duty trucks built after 1996."

Van Demark says "We provide a tamper detection feature whereby there is a notification via email/SMS if the unit was tampered with or removed. Owners can also obtain MPG which is very important for determining fuel efficiency and to avoid unnecessary vehicle idling. Our monthly rates for up to the minute tracking are \$10/month and this includes all features"

LiveTracGuardian provides the most comprehensive GPS tracking platform at the lowest cost in North America. Monthly subscription rates are \$10 per month, and that includes mileage, fuel reports, real time diagnostic alerts, tow alerts, geofencing and much more. The LiveTracGuardian platform collects data in real time and provides an extremely user friendly web based platform to access logged data and set alerts.
