

BUCHAREST, ROMANIA, September 20, 2013 **/24-7PressRelease/** -- ITEXPO SUMTEC is a technology conference organized by SUMTEC, value distributor specializing in Unified Communications in Central and Latin America.

The conference showcased the latest solutions oriented in integrated corporate communications resources. The attendees had access to each sponsor conference and to the exhibition area where the main products and technological innovations were presented.

SUMTEC is for more than 20 years a developer of innovative technologies in IP Telephony and through this event, the company showed the latest hardware application and IP Telephony solution dedicated to the corporate area. Rohde & Schwarz Topex exhibited one of its main equipments such as Bytton VoIP, Bytton ICR and Mobilink IP, a GSM/UMTS small capacity gateway with VoIP interfaces. Its main functionality is to interconnect IP PBX or hybrid PBX with mobile networks. With TOPEX MobiLink IP the clients make significant savings on calls from IP to cellular networks and backwards (call termination and origination).

Bytton ICR is a M2M industrial router which provides high data transfer rates over 3G+ network. Beside advanced VPN and secured software features, the equipment offers industrial grade characteristics such as DIN Rail mounting, rugged metal case or extreme environment conditions for operation and storage. Bytton ICR includes a large range of communication interfaces and protocols supervised by advanced mechanisms such as backward capability including cross 3G+ network coverage, WAN, WiFi and USB connections.

Bytton VoIP is a 3G+ VoIP Router which integrates VoIP telephony features over HSPA+ cellular network and wireless high speed data routing in a single unit. Suitable solution for the broadband data connection and VoIP applications, Bytton VoIP provides the migration of customer legacy PBX to the mobile operator IMS or NGN network. It is a cost efficient solution gathering VoIP, T.38 fax and data applications from the same equipment.

"It is always an honour to participate to the annual Sumtec ITEXPO event, providing us the opportunity to interface with the mobile telecommunication market leaders in South America", declared Mr.Constantin Dumitrescu, Sales and Marketing Director at Rohde & Schwarz Topex. "We hope that our new and innovative equipment shown at the event will provide many benefits to all customers from the telecom industry allowing us to increase our visibility in this market.", added Mr. Dumitrescu

About SUMTEC SUMTEC is a technology company considered a leader in the Peru region. By promoting high-quality telecommunications solutions, it aims at raising the productivity of their customers to improve their competitiveness locally and international. SUMTEC ensures sustained growth to its customers and business partners that allow them to gain upon competition.

About Rohde & Schwarz Topex:

Rohde & Schwarz Topex SA, a subsidiary of Rohde & Schwarz, is among the most innovative, fast growing European manufacturers of telecommunications equipment, providing a wide range of telecommunications applications. The company has over 20 years of experience in research, development and manufacturing of both civil and military telecommunications devices. Rohde & Schwarz Topex SA.'s expertise includes: ATC voice communications systems (VCS), next generation network solutions (NGNS), softswitch, media gateways for TDM, VoIP, GSM and CDMA (2G, 3G), signaling gateways (SS7, ISDN, R2, SIP and H323), broadband Wi-Fi mobile routers and fixed-mobile terminals (2G, 3G).
