

OAKLAND, CA, September 20, 2013 **/24-7PressRelease/** -- The shape, size, spacing and health of a person's teeth are fairly unique and depend on various factors, including diet, dental hygiene, genetics and how a person loses baby teeth. Unfortunately, this uniqueness is not always aesthetically pleasing. Personal identifiers-asymmetrical shapes, gaps, chipped teeth, crowding, missing teeth and discoloration-can cause a loss of confidence and unwanted stress.

An American Academy of Cosmetic Dentistry (AACD) survey has revealed that 99.7% of adults believe an attractive smile is an important asset, while 74% believe an unattractive smile can negatively affect a person's career. Piedmont Avenue dentist Dr. Dennis Guest understands how important bright, confident smiles are to his patients. In addition to offering expert general dentistry, Dr. Guest offers cosmetic dentistry to help his patients achieve the smiles of their dreams.

Cosmetic dentistry refers to dental procedures that improve the aesthetics of a person's teeth but not their function. Subsequently, cosmetic dentistry is often associated with cosmetic surgery, which can cause anxiety for adults unfamiliar with cosmetic procedures. Cosmetic dentistry at Dennis Guest, DDS, Inc. is an excellent option for patients who are interested in cosmetic dental enhancements but feel uncomfortable or are unfamiliar with the process.

Dr. Guest offers cosmetic services in the supportive, trustworthy environment that the community has known for years. "We try to treat every patient like a family member," said Dr. Guest, Oakland dentist. "Most of our patients stay with us for many, many years. In some cases, we see up to three generations of family." Dr. Guest's celebrated experience in general dentistry makes going in for a cosmetic consult feel as commonplace as a routine checkup.

Dr. Dennis Guest, dentist in Oakland, offers veneers, implants, Invisalign straightening, teeth whitening, cosmetic contouring, fillings and caps at competitive rates. All services require an initial oral examination to determine which treatment options are suitable. In some cases, multiple services may be required to achieve the desired results.

Patients can schedule a consultation to discuss their goals and have their teeth examined by phone or online. For more information, visit his website at <http://www.dennisguestdds.com> or contact Dr. Guest's office at (510) 654-6714.

About Dennis Guest, DDS: Dr. Dennis Guest has practiced dentistry in the bay area for over 30 years, having received his Doctor of Dental Surgery degree in San Francisco in 1974. He is a
