

RANCHO CUCAMONGA, CA, September 20, 2013 **/24-7PressRelease/** -- Technology Management Solutions will provide Medi Nuclear with 24x7 Remote Monitoring and Help Desk, Cloud Exchange Services, local and offsite Data Backup Services with Virtualization, Onsite IT Support and Disaster Recovery Services.

"This new agreement shows that healthcare and manufacturing companies understand the value that Information Technology plays in their business, and that TMS has a great understanding of these 2 industries." "Our new partnership with Medi Nuclear will enable us to greatly expand the efficiency and overall productivity of Medi Nuclear's business operations and ultimately, their customer satisfaction levels," -Tom Hill Co-Founder/ VP of Sales & Marketing. "We look forward to collaborating with them throughout this process to ensure their IT operations clearly align with their overall business objectives."

"After speaking with several providers, we chose Technology Management Solutions based on their experience, reputation as well as the overall value they could bring to our organization," said Heather Conklin "The IT implementation strategy they've outlined will enable us to enhance the quality of IT services we provide to our internal clients, and better support our company's overall operations - in a timeframe that is aggressive, without risking support issues. We are excited in this new partnership."

ABOUT Medi NuclearMedi/Nuclear was founded in 1973. In 1977, production began on Xe-133 gas and the Xeno/Cal Xenon Calibrator. This was followed in 1979 with introduction of the Xenon/Master Patient Delivery System. In 1987, the Aero/Vent Radioaerosol Delivery System was introduced. Over the years the Aero/Vent has been improved to deliver ever smaller aerosol particles. The current model, the Aero/Vent Jr delivers fine particles, over 97% of which are less than 1 micron in size, resulting in excellent peripheral penetration without unwanted central deposits. This technical achievement has been accomplished through the efforts of Medi/Nuclear researchers and the clinical assistance of major medical centers. Medi Nuclear is based in Baldwin Park, CA.
