

ST. GALLEN, SWITZERLAND, September 23, 2013 **/24-7PressRelease/** -- ForaCare Suisse AG located in St. Gallen, Switzerland, announced today a successful establishment of compatibility with DIABASS to enable diabetes patients to easily transfer blood glucose readings directly from FORA and FORA Diamond blood glucose monitors to DIABASS, a diabetes diary for blood glucose, insulin and sporting activities.

The new collaboration made it possible for patients to upload blood glucose readings by simply connecting their devices via interface cable to their computers. Blood glucose values and therapy data are recorded and analysed, helping patients to be better equipped for consultations with their doctors.

DIABASS is designed with a user-friendly interface for any type of diabetes. The clear reports and analyses are a valuable aid to parents of children with diabetes, who can always keep an eye on the values. It is a powerful tool for mums-to-be to keep blood glucose levels under control during pregnancy. An insulin pump wearer will have all the data necessary for doctors to evaluate and optimize his or her insulin pump therapy.

The DIABASS compatible blood glucose monitors include FORA Diamond PRIMA, FORA Diamond VOICE, FORA Diamond MINI with micro-USB connectivity, FORA Diamond MINI with Bluetooth connectivity, and FORA COMFORT pro GD40.

All ForaCare monitoring devices are validated as highly accurate in the industry and provide superior quality directly to consumers. FORA and FORA Diamond Blood Glucose Monitors are validated according to ISO 15197 requirements at an internationally renowned diabetes institute in Ulm, Germany.

Fora Care devices comply with new ISO standards and have completed third party validations:- FORA Diamond strips (for the Diamond series) is clinically validated in Czech and Switzerland and is proven to meet the +/- 15% required by the new ISO 15197:2013. - FORA Comfort pro GD40 (with 5-electrode technology) is clinically validated in Switzerland and is proven to meet the +/- 15% required by the new ISO 15197:2013

ForaCare provides FDA cleared and CE marked innovative health monitoring devices that provide simple connection to the FORA system. For more information, please visit www.foracare.ch
