

VAN NUYS, CA, September 24, 2013 **/24-7PressRelease/** -- Proteus Air Services is happy to announce the opening of a second location at 16644 Roscoe Boulevard, Van Nuys, CA. Operating out of the Cutter Aviation FBO, the new Proteus flight school is attracting strong interest from student pilots looking for a professional, well equipped, and friendly environment to train for their certificates.

"Expanding to Van Nuys was a logical step for us," says Rymann Winter, President of Proteus Air Services. "We place a great deal of importance on professionalism and customer service, and this has translated into significant business growth. Put simply, we needed to expand to meet the demand. Van Nuys is proving to be a great airport to work out of - I am very happy we can offer the high level of training and service Proteus provides to new students in the Van Nuys area."

While many flight schools are still struggling to recover from the economic downturn, Proteus Air Services has seen its business increase by 20% in the last 12 months.

"Good customer service is incredibly rare in flight schools. As an industry we all operate similar aircraft with a fairly standardized way of teaching - customer service is truly what makes a school stand out from the pack, and of course has a direct influence on profitability" says Mr. Winter.

Proteus Air Services provides superior flight training, aircraft rental, and sightseeing flights. Exclusively operating a Piper Aircraft fleet since the schools founding in 1996, Proteus Air Services has a simple mission: provide the very best flight instruction and customer service to students, passengers, renters, and other clients in the Los Angeles area.
