

VICTORIA, BC, September 24, 2013 **/24-7PressRelease/** -- Ryan K Grealy, former Designer and Assistant Manager for Peninsula Signs Ltd., announces the launch of a new, imaginative, dimensional sign and creative carvings business; RKG 3D Creations.

The 3D sign company will offer dimensional signs and imaginative projects to businesses and individuals on a local, national and international basis. "The projects I try to create and want to continue to create are geared towards putting two types of smiles on my client's face. One is a smile of child-like joy and fun upon seeing the finished project and the second is the smile of seeing the project do what it was intended to do; be it bring customers into their store (increase sales), put a smile on someone's face (a gift) or simply use as an accent to finish off a room in their home."

With projects ranging from a large lollipop sign to a hanging cupcake sign to a retro-rocket lamp to address signs to pet memorial planters to name plaques, (to name only a few), the possibilities and fun are endless.

"Although there are many promotional, trophy and sign shops, both US franchises and locally owned, on Southern Vancouver Island, RKG 3D Creations intends to offer something more...something unique...something that pops out and grabs peoples attention."

Through our use of modern technology and materials such as HDU (High Density Urethane) foam, sculpting epoxy and other professional finishing, Grealy's projects last years longer than traditional wood signs. HDU is impervious to the elements thus lasting for many years without rot & minimal maintenance. It has low expansion and contraction rates making cracks and warping nonexistent. HDU is also lighter making it easier to handle.

While viewing Grealy's work at <http://www.rgrealy.com> make sure to visit his Awards/Recognitions page to read about how his work has been featured in all five North American Sign Industry Magazines, including being featured on two covers and a three page article.

With the goal of creating projects that wow, inspire and entertain, RKG 3D Creations looks forward to creating something unique for you. "The world is a 3D place...why not sign it that way?"
