"goodbye lisbon" was created by Jorge Alves, a Portuguese musician who has been making and producing electronic music for almost two decades. He started as a DJ in high school in the 90's and ended up working as a professional DJ in reputed discos in Madeira, such as Bacará, Vespas and F1.

His love and burning passion for electronic music started then! The music styles of House, Techno, Trance and Break Beat were always on his turntables every night.
