

Prevagen Reaches Full Distribution in CVS Stores Nationwide

Written by Australian Business

MADISON, WI, September 25, 2013 **/24-7PressRelease/** -- Quincy Bioscience, a Wisconsin-based biotech company, is thrilled to announce that Prevagen has reached a significant milestone - the unique brain health supplement is now available in every CVS store nationwide.

In 2010, Prevagen rang in its third anniversary by celebrating the reach of product distribution in over 6,000 stores including both independent health food stores and Ride Aid pharmacies. Soon after, Prevagen became available in Walgreens and CVS stores across the country. Quincy Bioscience is more than pleased to see its distribution status escalate to now over 20,000 stores in the United States.

"We are very thankful to our retail partners for their vision in recognizing the need for better brain health across America and for making Prevagen readily accessible to their patrons across the country," said Mark Underwood, President and co-founder of Quincy Bioscience.

"Prevagen has become America's best-selling memory product in drug stores nationally," said Tom Dvorak, Vice President of Sales and Marketing. "A good portion of our success comes from the repeat purchases of our loyal customers. It's very gratifying to see that we have been able to make such a profound difference in the lives of so many people."

About Quincy Bioscience: Quincy Bioscience is a biotechnology company based in Madison, Wis. that focuses on the discovery, development and commercialization of novel technologies to support good health in aging. The company's products focus on supporting memory and cognitive health. Quincy Bioscience is set apart by its cutting-edge applications of the protein apolipoprotein A-II, which is breaking new ground in the area of brain health.
