

Dentist In Vallejo Offers Dental Crowns For Improved Oral Health

Written by Australian Business

VALLEJO, CA, September 26, 2013 **/24-7PressRelease/** -- A dental crown is not that much different than an actual crown that sits atop a King's head. A dental crown sits on top of a problem tooth and makes it look 10 times better. It can also significantly improve the function of the teeth because dental crowns assist with the proper chewing and digestion of food. Dr. David M. Gordon, a dentist in Vallejo, CA, offers this popular dental service at his practice and utilizes crowns for patients who have certain dental issues.

A dental crown is an artificial tooth that is formed to fit over the surface of another (original) tooth. It not only improves the general appearance of the teeth, but also the function. Dental crowns in Vallejo are relatively inexpensive in comparison to certain types of dental issues, such as tooth loss.

A dental crown is usually the solution of choice when a natural tooth has become so decayed and infected that large portions of it has to be removed. For example, after a root canal much of the pulp of the tooth is removed to eliminate and neutralize bad bacteria. A crown is also common when a filling goes bad or the tooth is cracked. Sometimes a crown is simply used to cover up a badly stained or discolored tooth. Crowns are available in a number of shades depending on the customer's preferences and natural tooth color.

The process of getting a crown with Vallejo dental crowns dentist Dr. Gordon is fairly simple. He takes an impression of the tooth that is going to be covered and then creates a custom crown mold. After that the crown is cemented on top of the original tooth. The result is a new, semi-permanent natural looking tooth.

"Dental crowns are a simple way to resolve a number of existing dental issues for my patients. They are happy to learn that with proper maintenance a crown can last for up to eight years, or even longer. We work hard to make patients feel at ease by providing exceptional patient care in a relaxed, convenient atmosphere," Dr. David Gordon, a Vallejo, CA dentist, explains.

Getting "crowned" is a simple matter of setting up an appointment to get an evaluation and an impression made. For dental crowns, Vallejo residents are encouraged to schedule a consultation today with Dr. Gordon's office at <http://www.myvallejodentist.com>.
