

Dentist Keeps Smiles Whole With Same Day Crowns in Coppell, TX

Written by Australian Business

COPPELL, TX, September 26, 2013 /**24-7PressRelease**/ -- Technological advances in dentistry have opened the door to same day smile restoration in recent years, most notably same day crowns in Coppell. This service is still not offered everywhere, though it is the most efficient option for patients in need of a crown.

Before this advancement, patients had to wait days for a crown. To protect the root or tooth, a dentist would apply a temporary. Temporary crowns are normally silver in color, clunky and sometimes fall off before a patient's follow up appointment.

"A smile is one of the first things people notice," said Dr. Larson, Coppell dentist. "Same day crowns restore your smile faster. No more waiting. No more pursed lips or awkward chewing. I am very happy that I can provide this service to my patients."

A crown is a tooth cap molded to mimic the tooth it is replacing or enhancing. Crowns are used for both functional and cosmetic purposes. They are most commonly used after a root canal procedure. A root canal is performed on badly decayed teeth or instances when the pulp or nerve has been infected.

"These conditions can require tooth extraction if not treated promptly," said Dr. Larson. "Unfortunately, the timing is not always ideal. Patients can find out they need a root canal days before a job interview or wedding, times when they want their best smiles to shine. Same day crowns are time sensitive to help patients through these moments."

After a root canal, the remaining tooth is tiny and incredibly fragile as it is closer to the nerve. To protect the root and remaining tooth, dentists apply a crown. A crown protects and restores the patient's bite and smile. Crowns can also be used with dentures and to restore chipped and cosmetically contoured teeth.

Dr. Rick Larson is a skilled, approachable dentist prepared to offer Coppell same day crowns using the quality materials and expertise the community deserves. For more information or to schedule an appointment, patients can visit Dr. Larson's website at <http://www.ricklarsondds.com> or contact his office at 972-304-0489.

About Rick Larson, DDS: Dr. Rick Larson is a solo dental practitioner who loves to serve people whether it is in the dental chair or in a small town in South America. Dr. Larson strives to provide his patients with the best in quality dental care, including sleep apnea and snoring treatments, Invisalign and same day crowns with CEREC. The main objective in Dr. Larson's office is to help his patients feel good, look great and be healthy. Part of this approach involves seeing the patient as a person and not just a mouth. As a graduate of Baylor College of Dentistry, Dr. Larson has come to love the Dallas area and now considers himself an adopted Texan. Membership in organizations such as the American Dental Association, Texas Dental Association and the Academy of General Dentistry, helps him stay connected to important information regarding regulation in the ever-changing dental field. Each year Dr. Larson spends more hours than required, on continuing education so that he may serve patients with the "latest and greatest" technology. Dr. Larson also spent two years of his life on a humanitarian mission to Northern Chile where he became fluent in Spanish.
