

Grace Industries Announces Release of Confined Space Telemetry Safety Kit

Written by Australian Business

SAN JOSE, CA, September 27, 2013 **/24-7PressRelease/** -- The Grace Confined Space Solutions provide the ability to electronically monitor confined space worker safety while satisfying OSHA 1910.146.

The Confined Space Telemetry Safety Kit features electronic monitoring of worker safety using wireless, Radio-Frequency (RF) signaling for evacuation, distress- man-down and out-of-range notification. 'Simple safety' is key in this system.

The Confined Space Telemetry Safety Kit includes two Rechargeable TPASS 3, motion-sensing man-down alarms, one Rechargeable SuperCell SC500 supervisory monitor, one Micro TPASS Repeater used to extend system range, and one Rechargeable Portable Confined Space Alarm featuring dual sirens and high intensity strobe light.

Many Complex Safety Systems in use today require large budgets. Grace provides a budget-friendly solution for smaller companies by providing a flexible confined space safety package for under \$6,000. This kit is expandable and supports an unlimited number of additional Grace Worker safety devices.

V.P. of Research and Development at Grace Industries, Bob Campman states, "The confined space solution was created as a versatile, high performance safety monitoring system to fill the growing needs of industry while providing a high-level of on-site worker safety, accountability and monitoring"

The Confined Space Telemetry Safety Kit components use Grace's patented Smart-Signal radio telemetry providing a high level of signaling performance in various complex building structures. The Grace TPASS and SuperCELL motion-sensing man down alarms report the real-time safety status of workers back to the supervisor and the Portable Incident Alarm unit. The innovative design of this product allows workers in confined spaces to be effectively monitored enhancing their safety.

Since 1974, Grace Industries has developed "Solutions for Life Safety" for Fire, Industrial, Mining and Transportation markets in more than 31 countries. From its TPASS product, Grace is best known as a world leader in Fire Fighter 'man-down' alarms and automated personnel accountability safety systems. Grace offers a diverse suite of radio telemetry personal safety products including various other visual alerting and audio alarm safety products used in virtually any safety application.
