

Somfy To Exhibit At The Inaugural StormEXPO

Written by Australian Business

TRENTON, NJ, September 27, 2013 **/24-7PressRelease/** -- Somfy Systems, Inc., the world's largest manufacturer of radio-controlled motors (Radio Technology Somfy - RTS) for interior and exterior window coverings, will be showcasing their TaHomA total home automation system and SIMU products at the inaugural StormEXPO. TaHomA will be located in booth #T10 and SIMU motors and controls will be on display in booth #T15. Presented by Storm & Security Protection Magazine, StormEXPO will feature product exhibit booths and tabletop displays showcasing products, tools and equipment for designing, building and retrofitting safe and secure homes, commercial properties and businesses.

Somfy's TaHomA is an affordable home automation system which gives users total control of all of their Somfy motorized window coverings along with lighting and thermostats using Z-wave , an interoperable two-way RF mesh networking technology. Accessible from computers, tablets and smartphones, TaHomA's user-friendly interface lets consumers easily take control of their home's motorized lights, thermostats and window coverings, including Somfy motorized Rolling Shutters.

Somfy's motorized Rolling Shutters help protect homes from damaging storms while also reducing noise, managing artificial light and optimizing a home's energy efficiency. Rolling Shutter opening and closing settings are automatically maintained by the motor to ensure total opening and secured closure each time. Somfy's motors provide increased resistance to rolling shutter lifting attempts by wind, water and debris during severe storms. By pairing Somfy's Rolling Shutters with TaHomA, users' can control their shutters via their computer, tablet or smartphone ensuring their home is protected, even if they cannot be there.

Somfy will also be showcasing their SIMU brand of Hz radio controls and motors. Hz radio protocol is world renowned for its rolling code technology and encrypted protection. On display will be their line of durable SIMU motors for roller shutters, awnings, garage doors, and industrial and commercial closures designed specifically for building closure and solar protection. Also on display will be the SIMU's line of Hz radio hand-held controls and wall switches, designed to allow users to easily control their motors.

StormEXPO 2013 is being held at the B Ocean Hotel in Fort Lauderdale, FL. September 26-27. If you will be attending the show and are interested in learning more about Somfy's TaHomA system please stop by booth #T10. To see Somfy's SIMU brand of controls and motors, please visit booth #T15.
