

Flex Plans Help Baltimore Eyeglass Contact Lens Wearers with LASIK Cost

Written by Australian Business

BALTIMORE, MD, September 29, 2013 **/24-7PressRelease/** -- Baltimore and Washington, D.C. eyeglass and contact lens wearers will continue to benefit from the availability of employer Flex Plans to help make the cost of LASIK surgery affordable even in challenging economic times. "We want to advise patients that if they still have Flex Plan funds available for 2013, now is the time to use them so as not to lose them," noted Phillip Harrington, Practice Administrator. "The extra dollars of pre tax savings Flex Plans offer for LASIK Surgery makes the cost readily affordable," remarked Mr. Harrington. Since a significant number of patients seeking LASIK in and around Baltimore and Washington, D.C take advantage of FSAs, year end 2013 is when individuals wishing to have LASIK Surgery absolutely need to use any remaining Flex Plan funds so they are not lost at the year end. In the event that you have already used all of your allocated 2013 Flex Plan funds, then it is time to specify that you would like your employer to set aside \$2,500 for you for LASIK in January 2014. Remember that if both spouses have Flexible Spending Accounts (FSA) through work, it is possible for each to withhold \$2,500 in order to make the cost of LASIK easily affordable. "Our patients really find that having their employer take a small amount of money out of each paycheck-especially since it is before taxes-is a great way to have LASIK with extra savings and easy payments," stated Mr. Harrington.
