LAKESWOOD, CO, September 29, 2013 /**24-7PressRelease**/ -- Today, millions of patients are searching for the best way to brighten their smiles. Patients who suffer from discolored teeth can visit Dr. Ronald Morse in Lakewood for Teeth Whitening treatments that are catered to their individual needs.

Dr. Ronald Morse and his team of dental professionals work together to provide their patients with helpful whitening tips so they can enjoy an improved, younger-looking smile. Today there are a variety of products and procedures available to help improve the look of a patient's smile. With in-office techniques available as well as take home whitening kits, Dr. Morse encourages patients to visit his Lakewood family dentistry office for the best treatments possible.

"Whether our patients enjoy our in-office whitening treatments or our take home whitening kits, it is our goal to help our patients smile bigger and brighter than ever before. By visiting our office, we will work with our patients to create the best treatment option for their individual case so that they can smile with confidence this fall season," said Dr. Ronald Morse about teeth whitening in Lakewood.

Dr. Ronald Morse and Dr. Justin Petracek offer multiple strength solutions for home whitening, as opposed to a "one size fits all" approach. Dentist-dispensed custom whitening trays, when used as directed, have been proven to be as successful as in-office whitening bleaching when used over an extended period of time.

"Even though patients can get over-the-counter whiteners without a dentist's recommendation, if overused, they can harm the tooth enamel and irritate gum tissue. Supervision by Dr. Morse or myself, can help to prevent these problems, so that patients can enjoy a healthy, white smile," said Dr. Justin Petracek about teeth whitening treatments in Lakewood.

Additionally, patients are encouraged to maintain regular dental visits to this Lakewood family dentistry, as well as the maintenance of a proper dental regimen. By brushing twice a day, flossing daily and eating a healthy diet, patients can continue to maintain a healthy, glowing smile for a lifetime. While whitening procedures help to whiten a patient's teeth, maintaining a daily oral hygiene regimen will help to maintain a white, bright smile.

For more information about available teeth whitening in Lakewood patients are invited to visit the practice online at <http://www.ronaldmorsedds.com/> or by contacting Dr. Ronald Morse at (303) 279-6929.
