

DENVER, CO, September 29, 2013 **/24-7PressRelease/** -- Christie and Display Development are partnering at CEDIA Expo 2013, taking place September 26-28 in Denver. The show's theme: "Evolving Technologies in the Integrated Home" will highlight the executable tools and the right type of focused resources to help users adapt and evolve their business and own the network and the home.

Among the systems at Display Development's booth # 3812 are various projection displays, as well as high definition flat panel solutions that can be installed both in-ceiling, in-wall, and out-of-doors, even in harsh environments.

Featured solutions include the Christie M Series 3-chip DLP projectors and the Christie FHD551-W outdoor flat panel, a weather-resistant display with optically-bonded glass that allows for countless signage possibilities both indoors and outdoors. The Christie FHD551-X 55-inch high definition flat panel with ultra-narrow bezels for a near-seamless display and the optional Corning Gorilla Glass will also be a highlight.

Combining unparalleled image quality with a low cost of ownership, the versatile Christie M Series of 3-chip DLP projectors delivers exceptional results in numerous applications. Available with WXGA, SX+, HD and WUXGA (1920 x 1200) resolution while providing up to 10,000:1 contrast ratio, the industry-leading and dependable Christie M Series also feature Christie Twist, which enables edge-blending and warping.

Rugged and versatile, the 55-inch Christie WeatherAll FHD551-W, a professional grade full HD (1920 x 1080 resolution) solution, is designed to perform in a wide range of applications including outdoor sporting venues, outdoor live events, theme parks, wayfinding, resorts, transportation, and other outdoor environments not typically applicable with standard LCD panels.

Ideal for a variety of large-format, tiled display wall applications, the Christie FHD551-X is a professional grade LCD flat panel with full HD resolution, an ultra-narrow bezel and an energy-efficient LED backlight.

The partnership also includes the Christie CP4230 DLP Digital Cinema projector. Fully DCI compliant, the Christie CP4200 platform is the only 4K DLP solution able to provide the world's most brilliant 3D images, the highest level of content security, and the easiest adaptability, operation and maintenance.

"Display Development is recognized for its striking and architecturally elegant solutions to residential display systems that exceed the expectations of even the most discerning clients," said Bryan Boehme, senior sales manager, Christie. "Christie is pleased to provide its award-winning digital projectors and flat-panels to help expand Display Development's offering with a new series of superior visual displays that combine the company's technical and design expertise with the power and performance of Christie digital solutions."

Christie technology will also be at the Stewart Filmscreen booth with a Christie D4K2560 on display while the show's Digital Cinema demonstration area features the Christie CP4230.

About Christie Christie Digital Systems Canada Inc. is a global visual technologies company and is a wholly-owned subsidiary of Ushio, Inc., Japan, (JP:6925).
