

Vinlala Revolutionizes Organic Shampoo

Written by Australian Business

DALLAS, TX, October 01, 2013 **/24-7PressRelease/** -- A newly revolutionized shampoo is on the rise. Vinlala, created through innovative thinking that promotes environmental sustainability; has advanced formula that is organic and has no derivatives of silicone.

Founded by Chief formulator, Enlina vin and botanist, Larau Thompson; Enlina entrusted her works to develop a non-silicon shampoo formula, with many unsuccessful attempts, Enlina met Larau Thompson out of New York in 2004 where they joined forces to create an organic non-silicon formula, birthing the brand Vinlala.

"This new product release is truly a breakthrough of innovation. Once having used this natural non-silicone shampoo, you will not want to return to your normal daily use shampoos, as you can literally feel the difference with the health of your hair!" says a spokesman for Vinlala.

Vinlala focuses on environmental sustainability and the efficiency of organic elements that benefit the consumers. Environmentally, Vinlala has improved proficiency by producing less plastic and manufacturing containers uniquely designed to satisfy our consumers with high quality products; thus saving money and allowing more nurturing to organic farms. Traditionally, shampoo includes silicon and other additives that promise a great look, when in reality silicon can cause build-up on the hair, hair loss, and in some cases, dandruff. With Vinlala, all ingredients are natural and can provide long-term benefits to the scalp. Through superior extraction methods with oils, plants, flowers, and herbs of the earth, Vinlala, uses high-level distillation, to provide a remarkable experience that stimulates a more desirable, efficient and spa-like appearance.

No matter the occasion, Vinlala addresses any hair condition and is designed to bring out the natural bounce and shine in any individuals hair with all natural, non-toxic ingredients that will retain the beauty effect desired.
