

LANSING, MI, October 01, 2013 **/24-7PressRelease/** -- The Environmental Hygienists Association (E.H.A.) has premiered its newly-expanded global directory of Certified Mold Inspectors and Certified Mold Remediators to enable property owners, managers, and tenants to find qualified mold testing and mold removal services in the USA, Canada, Europe, Middle East, and Asia.

The mold inspector finder database is available at <http://www.certifiedmoldinspectors.com>. The included mold inspection and mold remediation professionals have been educated and certified by the E.H.A. at <http://www.ecology-college.com> online, or now at the E.H.A.'s newly-opened mold inspector and environmental hygienist training center in Montrose, Michigan, east of Lansing.

Exposure to elevated levels of indoor toxic mold at home and at work can cause over 100 major medical problems including, but not limited to, lung cancer, permanent brain damage, and severe respiratory problems. Read the top 100 mold health problems at <http://www.moldinspector.com>.

The E.H.A. works closely with the Mold Victim Rights Association through its website <http://www.moldvictimrights.com> to assist toxic mold victims who have been mold-endangered in these ten mold-infested circumstances---

1. Working in a mold-contaminated workplace; 2. Living in a moldy rental house, apartment, condo, office, or commercial building; 3. Being a guest in a moldy hotel, motel, or resort room; 4. Occupying a moldy home purchased from a seller or new home builder who failed to disclose known mold infestations; 5. Suffering water leak and resulting mold damage problem caused by an adjacent or nearby condominium, apartment, or other rental unit; 6. Paying mortgage payments to a lender for a mold-infested house, condo, or commercial building; 7. Not being able to pay for needed mold removal services because the insurance company has wrongfully denied a water or mold damage insurance claim; 8. Living or working in a moldy house or building that was improperly or incompletely mold remediated by a mold removal company; 9. Occupying or being employed in a building that has been water and mold damaged by a careless or untrained building contractor such as a roofing, plumbing, or air conditioning company; and 10. Being a student or teacher in a mold-infested school.

E.H.A. executive director Phillip Fry hosts a free Mold Advice Hotline toll-free 1-866-300-1616 that enables mold victims to get free answers to their mold questions. Mr. Fry's cell phone is 1-480-310-7970.

Environmental Hygienists Association Announces Expansion of Global Mold Inspector Directory
