

TORONTO, CANADA, October 02, 2013 /**24-7PressRelease**/ -- Last Week the Managing Partner of one of EPIC Software Corporations clients, Derhak Ireland, a prestigious executive search firm and owner of RightFit Recruiting agency, conducted a webinar through HR.com, a global professional association for HR Leaders and Practitioners. A portion of that webinar focused on the due diligence Derhak Ireland exercised to choose the best pre-employment assessment tools, tools that are responsible for assisting Derhak Ireland achieve the highest 24-Month Candidate Retention Rate of any Search Firm in Canada over the past 5 years... an unparalleled 97.6%. After assessing over 60 pre-employment assessment tools, Derhak Ireland chose Ascentii's RoleFit Survey, (Ascentii is a division of Toronto-based EPIC Software Corporation).

HR.com's webinar sign-up portal was quickly slammed with webinar registrants wanting to reserve their seat; seating was capped at 100 attendees and over 1,100 interested HR professionals that wanted to attend (but couldn't due to limited seating) requested the recorded session link.

In response to the overwhelming interest in this topic, the President and CEO of EPIC Software Corporation, Mr. Gary L. Melling, has agreed to facilitate smaller, more intimate 1 hour webinar sessions to drill down into the detail of what the RoleFit Survey can do for businesses wanting to make a quantum leap in their hiring practices, employee engagement, customer retention, work force productivity and enterprise profitability.

Seating will be restricted to 25 executive participants per session on a first-come, first served basis and only be offered once a week for a limited time period.

Webinars will include three components:

- 1) A brief presentation
- 2) A demonstration of the pre-employment assessment tool used by Derhak Ireland to achieve their 24-Month Candidate Retention Rate of 97.6%, and;
- 3) An open Q&A session with Mr. Melling

NOTE: Only the first 25 participants for each live session will be accepted on the date and time of the session. The intention is to provide HR leaders and business decision makers with unique access to a published thought-leader (Harvard's Journal of Cost Management), with a proven track record of delivering high value enterprise results, and the type of Return On Investment (ROI) and Cost/Benefit that others only aspire to, in a forum that is both focused and interactive.

To attend this webinar, please click on the following link a few minutes before the session is scheduled to start, Thursday, October 3rd at 10AM EASTERN (Toronto):

Ascentii, a division of Burlington-based EPIC Software Corporation, has developed a competency-based assessment tool delivered via the Internet, to screen and rank order individual contributor, managerial, and executive level candidates within any job family within 1 minute of a job competition closing and before opening a single resume. The RoleFit Survey has been externally validated to be more accurate and reliable than competitors' assessments at predicting how successful a specific candidate will be performing specific work related tasks on a day-to-day basis for a specific role. Ascentii has analyzed 1,200+ jobs and created a unique job competency profile for each job. Welcome to the Future of Recruiting.
