

FAIRFIELD, CT, October 03, 2013 **/24-7PressRelease/** -- BedBug Chasers , a franchised heat remediation services company has added another new location headquartered in Fairfield, Connecticut. The new location is scheduled to open Sept. 15, 2013 and will provide bed bug killing and dry out services in lower and middle CT with plans to expand to Hartford and Northeast CT using BedBug Chasers patented process and heating equipment.

BedBug Chasers of Fairfield is owned and operated by Peter Kegler and Kevin Scott and will augment their existing real estate, storage and moving businesses that operate in Westchester County NY and all of CT.

The new franchisees both have first hand experience with bed bugs and Peter Kegler added "We were looking to expand our portfolio of businesses and wanted to get involved on the ground floor of a business that had the ability to explode. We had seen the bed bug population rise here in CT and Orkin's Top 50 Bed Bug List confirmed that Hartford/New Haven raised 10 positions in 2012 to #26 on the list and we decided BedBug Chasers was an opportunity with tremendous growth potential." BedBug Chasers heating systems quickly turn a home or business into a superheated convection oven. It uses 100% chemical free, highly specialized electric heaters and a proven methodology to quickly and effectively rid any home of infestation.

Kevin Scott continued, "You fish where there are fish and the market up here is wide open for BedBug Chasers. The business model is a simple. We kill 100% of the bugs and we will be offering these services to existing pest control operators as subcontractors and in areas where we have existing relationships, we will be servicing customers directly. What also attracted us to this business is the home and business dry out capabilities that we will now be able to offer. What the NJ office was able to accomplish for Sandy flood victims is just short of a miracle and we look forward to bringing this revolutionary process to Connecticut residents, as well."

BedBug Chasers VP of Franchise Operations Larry Smith commented, "As always, we are thrilled to see the brand continue to expand and with their experience in related businesses we believe this store will be wildly successful. Connecticut is a great market for us. There are many larger homes that other pest control operators simply can not treat as effectively because they do not have the capabilities. Our proprietary heaters and process will be a game changer!"

About BedBug Chasers: BedBug Chasers is a nationwide franchised heat remediation service company providing a 100% Green and Chemical-Free alternative to eliminating bed bugs and other insects in commercial, residential and industrial environments. Using its proprietary, state of the art electric heat technology, BedBug Chasers equipment is capable of facilitating fast, effective and inexpensive heat remediation services throughout the United States.
