

Dentist in Grand Rapids Improves Patients' Smiles With Dental Veneers

Written by Australian Business

GRAND RAPIDS, MI, October 04, 2013 **/24-7PressRelease/** -- If a patient wants a real Hollywood smile, in most cases veneers will have to be at least one part of the picture. Veneers form a fairly permanent layer of tooth-like material over the original teeth and make the smile look even, straight and pearly white. Ronald M. Olszewski, DDS of Grand Rapids MI is proud to announce the availability of custom made, custom fit veneers to give his patients a winning smile that will last for decades -- maybe even a lifetime.

Grand Rapids dental veneers dentist Dr. Olszewski takes a mold of the natural teeth, which is used to create veneers that will fit comfortably over each tooth. He then uses a dental bonding cement that ensures the veneer doesn't move out of place. Each veneer must be carefully placed individually -- the number of veneers needed to perfect a patient's smile varies from person to person depending on the shape and formation of the teeth.

Veneers first hit the dental scene in 1928 thanks to the insight of California dentist Charles Pincus. His motivation for creating the first veneer was to give an actor a better smile for his role in a movie. It's no surprise that this dental technology has its roots in Hollywood, where keeping up appearances can affect a person's career. Since the late 1920s, more advanced forms of veneers and the bonding material used to keep them in place have been developed by dental scientists.

Nowadays, people who have veneers can expect to keep them for up to 30 years or more. Grand Rapids dentist Dr. Olszewski is happy to offer his patients a way to smile brightly for decades into the future.

"Dental veneers are simply the best option for those who want a long lasting smile. With proper care and regular checkups they can last indefinitely," he explains. "I am enthusiastic about seeing my patients leave my office with teeth restored to sound condition and in the case of cosmetic dentistry, with an attractive smile."

Patients who want a Hollywood are encouraged to contact Dr. Olszewski's office to set up a consultation at <http://www.alwaysasmile.net>. The process of receiving veneers can often be completed in just a few visits.
