

ELIZABETHTOWN, KY, October 04, 2013 /**24-7PressRelease**/ -- Premier Elizabethtown, KY dentist, Dr. Marc Dyer, encourages patients to set up a consultation for straighter teeth with Invisalign at Dyer Family Dentistry. No matter the reason or event, patients can now easily straighten their teeth without anyone even noticing.

Traditional wire and bracket braces no longer need to be the only option to straighter teeth and a restored smile. Elizabethtown Invisalign is invisible, removable, and comfortable, but the best part is that no one will be able to tell that you are even undergoing treatment. Invisalign is great for both adults and teenagers who want to straighten their smile.

"Invisalign is a simple and convenient treatment with an outcome that often surprises my patients. It is a constant joy to see my patients smile bigger with a straighter smile at the end of their treatment. Their confidence and oral health improves with a straighter smile, and I am happy to offer such a convenient treatment plan with Invisalign," said Dr. Marc Dyer about Invisalign in Elizabethtown.

Introduced in 1999 by Align Technologies, Invisalign is a removable orthodontic appliance that incorporates a series of clear, plastic aligners that fit comfortably over your teeth. The aligners are designed to move your teeth gradually into the desired orthodontic position. Invisalign is a leading brand of orthodontic appliances.

With Invisalign, a patient's teeth will change, but their lifestyle doesn't have to. Invisalign allows patients to participate in sports and other activities without having to worry about cutting their lips and gums on sharp wires and brackets. Additionally, Invisalign aligners are removable, which means brushing, eating and flossing can be completed normally. As long as patients wear their aligners for the required number of hours every day, they will have the flexibility to remove the aligners as needed.

If patients are ready to take the next step to achieving a straighter smile, Dr. Marc Dyer, dentist in Radcliff and Elizabethtown, KY, encourages patients to visit Dyer Family Dentistry to find out if they are good candidates for Invisalign. Not all cases of misaligned and crooked teeth can be treated with Invisalign. Dr. Dyer will determine the best process for straightening teeth, further proving his commitment to providing patients with greater confidence and straighter smiles.
