

NEW YORK, NY, October 04, 2013 /**24-7PressRelease**/ -- With a nod toward the iconic work of mid-century American Masters working in wood slab, and modern Arts & Crafts interpreters, the WCT Console Table is a unique hand-joined and hand-finished work of contemporary art.

Featuring a massive single piece of African Mahogany sitting atop solid American Walnut legs, the WCT Console features a slightly cantilevered profile that elevates and accentuates the elemental force and grace of the wood's natural figuring and grain, without dominating the style or aesthetics of a room. It is a table equally impressive in a modern condominium, upscale cottage foyer, or corporate office.

The WCT Console table was designed and is hand built in Canada by a team of award-winning furniture builders. The WCT Console Table is crafted in two sizes:

•30"H X 60"W X12"D with a 3" Thick Top •30"H X 48"W X 10"D with a 2.5" Thick Top
