

SAN ANTONIO, TX, October 05, 2013 **/24-7PressRelease/** -- Health Portal Solutions (HPS), a San Antonio, TX- based web portal developer today announces their partnership with CareClix, a telemedicine company based in the Washington, DC area.

By integrating with CareClix, HPS' web portals will allow plan members or patients to schedule an appointment online, conduct an office visit over the phone or webcam, and access their electronic medical record, all within a secure, HIPAA-compliant environment.

"Health Portal Solutions is very excited to introduce CareClix to our clients and users," said James Burkholder, President and CEO of Health Portal Solutions. "The addition of a telemedicine solution enriches HPS' technology by giving plan members and their families convenient access to healthcare and resources for managing personal health."

The CareClix integration offers access to healthcare in a way that is both convenient and cost-effective for the plan member and for employers sponsoring employee healthcare.

"CareClix is happy to partner our revolutionary technology with Health Portal Solutions' innovative web portals. We look forward to creating an enhanced user experience and helping employees and employers decrease costs in today's healthcare environment," said Dr. Sunil Budhrani, a CareClix founder.

About Health Portal Solutions For over 10 years, Health Portal Solutions has developed and supported private-label web portals that let users access important medical data, claims information, and wellness tools while giving you resources to effectively manage and grow your business. Health Portal Solutions' web portal application conserves your organization's time and resources, and empowers users to make educated health and financial decisions on their own. The resulting cost savings, combined with an enhanced marketability of your organization, can grow your brand reputation and your bottom line.

About CareClix Founded in 2010, CareClix provides one of the most comprehensive telehealth solutions in the world, serving as a fully integrated, secure, and HIPAA-compliant platform to connect medical providers and patients worldwide. This revolutionary technology enables doctors to see patients in their clinical settings virtually as well as at home via remote health monitoring. CareClix also gives providers' access to a certified Web-based Electronic Medical Record system, e-prescribing, and lab testing—all in one integrated platform. CareClix Anywhere, CareClix Exam, and CareClix Home represent exclusive products powered by the

core CareClix processor. This makes CareClix and its technology unique in that it is the only integrated telemedicine platform providing a continuum of telehealth services-telephone and video access to a doctor 24 hours a day, seven days a week, to the virtual examination room, and to the patient centered medical home. In offering a comprehensive telemedicine solution, CareClix is changing the way patients see their doctor.
