

Creekside at Wade Farm by O'Dwyer Homes Celebrating Exceptional Sales Success

Written by Australian Business

ATLANTA, GA, October 06, 2013 **/24-7PressRelease/** -- O'Dwyer Homes has sold over eight homes in the past 60 days. "Recent sales have been spurred by buyer confidence in the economy, and the fact that the low interest rates will probably not last much longer as we continue to see the housing market turn around has really created a buzz in the community", states Dee Alexander, Sales Manager for Creekside at Wade Farm. Creekside is also offering incentives of up to \$4000 in paid closing cost if the buyer uses one of their preferred lenders. The buyer may divide this amount between closing cost and designer options.

Creekside at Wade Farm is an established Energy Star Certified new home community which is 20% to 40% more energy efficient than other new homes in the area and will save homeowners more money on energy bills for the life of their home. The community also features home sites with more than 75% of the homes backing up to lush green space.

The neighborhood offers a safe and convenient lifestyle affording homeowners a pool and cabana, pedestrian friendly sidewalks, two meandering streams, attractive tree-covered streetscapes, open common space and excellent access to shops, entertainment, dining, and major highways and is only ten minutes to downtown Atlanta.

Priced from the \$170's, Creekside at Wade Farm showcases both ranch and two story elevations with craftsman and traditional styling with slab and basement options. Schools for the community are: Harmony Leland Elementary, Lindley Middle and Pebblebrook High.
