

TORONTO, ON, October 07, 2013 **/24-7PressRelease/** -- Heating Ontario to offer 10% off of all heating services for senior citizens during the month of October 2013.

Are you dreaming of warm winters? You don't have to dream anymore! We are proud to announce that Heating Ontario is now offering 10% off of all heating services for senior citizens during the month of October 2013. Since you rely on your furnace to provide adequate heat and comfort, it always needs to be taken care of by an experienced professional. This is why our discounted offer is available with more than enough time to get your home ready for the winter season.

Some of the Heating Ontario services included in this special offer include regular maintenance, inspection, repairs, as well as new furnace installation. Each of these services benefits your home through the efficiency, longevity, and reliability of your heating system. To find out which of these heating services you require in your home, we recommend that you speak to one of our professionals as soon as possible.

Heating Ontario offers a number of essential services, including maintenance. Maintenance should be performed on your furnace twice a year, during the spring and the fall. This process includes the removal of built-up dust or dirt, changing your furnace filter, as well as an inspection for wear or any repairs that may be necessary. Regular maintenance on your furnace can extend the lifespan and keep it working efficiently throughout the winter season. This keeps your furnace operational and your home temperature comfortable.

Another service you may need in your home is the installation of a new furnace. When furnaces are older than ten years or start to show signs of wear, you will need to think about your replacement options. Putting off new furnace installation can cause your heating system to break down during the coldest months of the year. The good news is that this can be avoided! Each of our Heating Ontario specialists can help you to find the right furnace for your home and budget.

With our incredible offer for seniors, October is the perfect time to take care of your furnace. Luckily, this warm weather offer is available throughout the extensive Heating Ontario service area. We bring years of industry experience to clients all over Toronto and the GTA, including cities like Markham, Richmond Hill, Thornhill, and Vaughan.
