

IRVINE, CA, October 07, 2013 /**24-7PressRelease**/ -- [DriveClone](#) makes an exact copy of disk drives. DriveClone will also skip cloning Windows junk files and defrag files during disk cloning process to conserve space and maintain high storage efficacy. DriveClone supports hard drives, solid state drives (SSD), hybrid drives, GPT disk, and RAID drives.

"Most users have to manually re-install all software and applications when replace or upgrade their hard drives", said Peter Lin, Product Manager, Data Protection and Recovery.

"[Additionally] The new UEFI and GPT configurations have made migrate & cloning hard drives and SSDs very difficult. **With new mirror drive technology, users can be assured that all their data are safely transferred and protected without having to deal with the exuberating migrating process.**

" The DriveClone solution, serves over millions of computer cloning, is now also free for non-business use.

MIRROR DRIVE Mirror Drive "mirrors" a hard drive, which means the resulting hard drive will have the same contents as the source hard drive. The mirrored drive will be automatically updated when the source drive is modified, and any file changes, old, and new data are added into the archives. This allows users to go through their mirrored drive for any old or new data and retrieve any files without restoration process. Mirror drive is immediately bootable and can be used to boot on the system or a dissimilar computer for Zero-time disaster recovery. The instant recovery prevents system down-time and ensures business continuity.

DriveClone 10 Main Features: - Mirror Drive- Incremental Cloning - File Version Backup- Clone Hard Drive and SSD- Clone Windows and Windows Servers- Clone & Convert to VMware & Hyper-v- Universal Boot- Defrag Cloning- Support UEFI/GPT/RAID

Pricing & Availability DriveClone Workstation is sold for \$69.95. International languages are available, such as French, Italian, Portuguese, Sweden, etc. FarStone also offers a free version of DriveClone for non-business use. Welcome to download DriveClone at <http://www.farstone.com/software/drive-clone.php>

About FarStone With over 20 years of experience, FarStone Technology Inc. has developed a list of award-winning backup software including Total Backup Recovery, RestoreIT, and DriveClone. Farstone headquarters is in California, USA and specializes in PC backup & recovery. [More Info](#)
