

PLYMOUTH, MN, October 09, 2013 **/24-7PressRelease/** -- Advance introduces the SW4000, the company's newest rider sweeper designed to tackle demanding sweeping challenges. With a wide, highly maneuverable 49-inch cleaning path and long machine run-time of up to 4.5 hours on a single battery charge, the SW4000 provides high cleaning productivity and superior dust control for indoor and outdoor sweeping applications.

The SW4000 maximizes uptime and minimizes broom wear with One-Touch sweeping, which operates the main broom, side broom, vacuum fan and optional DustGuard misting system only when the machine is moving. To enhance sweeping capabilities, operators can employ the optional DustGuard to achieve a 75 percent greater dust-controlled sweeping path than comparable competitor machines. This not only improves indoor air quality, but also reduces overall cleaning time.

"With long run times, intuitive controls and efficient operations, the SW4000 delivers enhanced sweeping productivity and reliability," Mike Kanitz, Product Manager, Nilfisk-Advance, said. "Whether our customers are sweeping a large indoor warehouse or outdoor parking lot, the SW4000 ensures a professionally swept finish while maximizing their bottom line."

The SW4000 provides increased efficiency as well as the following benefits:

- Maneuverability** in tight corners and narrow aisles from front-wheel drive and front-wheel steering--
- Safe handling and fast dumping** through an effective hydraulic high dump and retractable hopper--
- Dust-free filters** with the Liberator multi-frequency filter shaker for optimal performance--
- Durable design**, including retractable, spring-loaded side brooms and rugged steel guards that virtually eliminate risk of machine damage

Designed for indoor and outdoor use, the SW4000 is ideal for a range of applications, including but not limited to warehouses, distribution centers, retail outlets, stadiums, arenas, lumber yards and parking lots.
