

SEATTLE, WA, October 10, 2013 **/24-7PressRelease/** -- Watts Specialties, Inc., leading pipe and tube fabrication manufacturer headquartered in Washington state will exhibit at the FabTech tradeshow. FabTech 2013 will be the largest metal fabrication event in North America with over 35,000 people in attendance and 1,500 exhibiting companies.

"Watts Specialties always attends these major events," said David Carr, Director of Sales for Watts Specialties, "and we will be at FabTech showcasing our W-244 Plasma Cutting Machine and the industry-leading PypeServer software, a 3D CAD-style pipe programming system for your at-machine, and remote programming needs."

"The PypeServer software is a complete pipe and job management system that will save you time and money by increasing the productivity of both employees and your Watts Specialties machine. We will be at Booth N2271. Come see our live demonstrations and we will be happy to discuss your fabrication needs."

Watts Specialties will have two computer controlled pipe cutting machines (CNC) on display at FabTech 2013: the W-244, six axis machine and the W-122, two axis machine, both systems offer vertical and horizontal compensation for "bent" or "out-of-round" pipe.
