

Dentist In Little Rock Offers Dental Veneers To Mask Dental Blemishes

Written by Australian Business

LITTLE ROCK, AR, October 10, 2013 **/24-7PressRelease/** -- One of the most popular cosmetic dentistry procedures is the placement of dental veneers. Veneers make the front rows of teeth look close to perfection as far as their size, spacing and color. Dr. Blake H. Weber of Family, Restorative, and Cosmetic Dentistry in Little Rock, AR knows the wow effect that they have on patients, which is why he is happy to offer dental veneers and other cosmetic services at his popular Little Rock dentist office.

When a person smiles with a near perfect row of teeth there's a good chance that they had veneers done. A veneer is made of a wafer like material (usually porcelain) that resembles the surface of a tooth. The dentist modifies the enamel of the natural tooth and prepares it to be covered with the custom veneer. The process is usually complete in about three visits. Most patients need to have between four and 10 veneers made to create a more attractive smile.

Offering a smile is like offering the world a gift. Having misplaced, chipped or stained teeth is distressing for many patients who secretly suffer with the effects. When someone is afraid to smile it can affect his ability to make friends and communicate on the job. It can affect a patient's overall self-esteem and confidence in himself, which is major.

When properly installed, veneers are long lasting, durable and resistant to staining. It's important to fully trust the dentist who is performing a veneers procedure and ask plenty of questions about what's involved. Dr. Weber is excited about the chance to give his patients smiles that they can finally be proud of thanks to veneers and other cosmetic procedures.

"We are committed to creating healthy beautiful smiles and veneers play a significant role in achieving that goal. When the patient leaves the chair I want her to smile all the way to her car and then the whole drive home," the dentist explains.

Patients are the number one priority at Dr. Blake H. Weber's office. For top quality veneers Little Rock local residents can contact his office to start the process and learn more about this cosmetic procedure.
