

BC Company Kryton International Inc. Celebrates 40 Years in Style

Written by Australian Business

VANCOUVER, BC, October 10, 2013 /24-7PressRelease/ -- Guests rocked out with an incredible live band from the 1970s (Crosstown Bus), while enjoying wine, Granville Island beer, and apples in our open warehouse as the sun shone down.

Along with the excellent music, food and drinks, guests got to experience our products up close, with a self-guided tour of our labs and offices. Our international sales team was here for our annual meeting, and enjoyed speaking to all of our guests about how our products work. The Kryton technical team was on hand in the labs, showing models, and Krystols growing under the microscope.

Kryton's CEO, Kari Yuers, was honored to be presented with an award from the office of Ms. Wai Young, Member of Parliament for Vancouver South commemorating the milestone anniversary. Also in attendance was Deputy Minister of Western Economic Diversification, Daphne Meredith who kindly congratulated Kryton on our 40 years of success. She added "It was a lovely celebration - so classy, such great spirit and pride in all those attending. I was so pleased to have been invited."

Our two grand prize winners were:

Dale Rublee won Fly & Dine Experience which includes a seaplane flight to Horseshoe Bay, dinner at the Boathouse Restaurant and a limousine ride back downtown.

Helen Fowler won a Two Night's Stay at Sparkling Hill Resort which includes a Superior Lakeview Room, breakfast and signature sauna and steam rooms experience.

The night included several other door prizes such as Flight Centre vouchers, luxury hotel stays plus the draw for our year-long Keeping it Reel customer video contest, which went to Steve Williamson from Cypress Mountain for his submission: Cypress Reservoir. Steve is enjoying his brand new iPad.

Kryton continues to evolve and adapt its product line toward future trends. By maintaining close relationships with distributors and customers world-wide, Kryton has a strong presence in the future of concrete waterproofing.

About Kryton International Inc.

Since 1973, Kryton has been the leading manufacturer of concrete waterproofing products, using their proprietary integral crystalline formula - Krystol. This success has taken the company to a global level, with offices in Canada, China, India, Dubai and the UK. Massive projects such as Las Vegas CityCenter, Marina Bay Sands and the Palm Jumeriah were completed using Krystol Technology, propelling Kryton into new markets.
