

HOUSTON, TX, October 12, 2013 **/24-7PressRelease/** -- Axxair-USA, Inc. announced today that it will exhibit at the FabTech 2013 tradeshow in Chicago (Booth N2008) and will be conducting live demonstrations of pipe and tube cutting, beveling and squaring. FabTech 2013 is one of the leading pipe and tube fabrication events in the world.

"FabTech is one of the most important tradeshows in our industry so we are excited to be conducting live machine demonstrations," said Jonathan Forte, Managing Director for Axxair-USA. "We will be doing live pipe and tube cutting and beveling demonstrations with our premier CC-171 System. We will also be showcasing our new bevel head that bevels wall thickness up to a half inch. Come by Booth N2008. We will be happy to show you our equipment and to discuss your fabricating needs."
