

RANCHO CUCAMONGA, CA, October 13, 2013 /**24-7PressRelease**/ -- Patients who have lost all of their teeth, or even a few, whether it is from periodontal disease, tooth decay or injury, dentures can have their teeth replaced and smile restored with dentures in Rancho Cucamonga. Replacing missing teeth as soon as they are lost is the best way to prevent serious health problems caused by tooth loss. At Renaissance Dental Care, Dr. Jay Stockdale and Dr. Doug Stilson, dentists in Rancho Cucamonga, provide patients with advanced treatment options for fully restored smiles.

"Delaying the restoration process will only limit the possibility for a successful tooth replacement in the future. Oral health influences your overall health, as teeth not only allow you to speak and chew properly, but they also have an influence on your self-esteem. A mouthful of missing teeth can give you a feeling of embarrassment and self-consciousness. With dentures, you can get a smile that looks, feels, and functions just like your natural teeth," said Dr. Jay Stockdale, a Rancho Cucamonga dentist.

Complete dentures are created when gums are restored to a healthy condition and an appropriate amount of time has passed for healing. With complete dentures, all of a patient's teeth are replaced in the upper and lower jaws of their mouth. The gums will naturally shrink through the healing process of tooth loss, which normally takes 6 to 12 months. During this period, immediate dentures in Rancho Cucamonga may require adjustments to accommodate the changes in gums and underlying bone structure.

Another option for tooth replacement is an over-denture, which is a removable dental prosthesis that covers and rests on one or more remaining tooth roots. In addition there is a removable partial denture, which is a dental prosthesis that replaces some teeth and is built around existing natural teeth. Both of these dentures may be connected to the remaining tooth roots or remaining natural teeth with anchors that are made of metal or plastic.

In Rancho Cucamonga dentures are designed by Renaissance Dental Care to be more comfortable and functional than they were in the past. They are similar in appearance to natural teeth, allowing a patient's smile to improve as well as his or her facial appearance. By consulting Dr. Jay Stockdale and Dr. Dough Stilson, dentists in Rancho Cucamonga, CA, patients can find out if dentures are an appropriate treatment plan for replacing missing teeth.

Dentures are not for everyone, but with a proper consultation at Renaissance Dental Care, the best treatment plan will be created to improve a patient's smile. Missing teeth can be a thing of the past with proper dental hygiene and dentures in Rancho Cucamonga. For more information please visit <http://www.renaissancesmile.com/>.

Rancho Cucamonga Dentist Restores Patients' Smiles With Dentures

Written by Australian Business

About Renaissance Dental Care: Renaissance Dental Care is comprised of two dentists in Rancho Cucamonga, Dr. Jay Stockdale and Dr. Doug Stilson. Together these dentists provide their patients with superior dental health care. Dr. Jay Stockdale graduated from the Dental School at Loma Linda University in 1985. Since graduating, Dr. Stockdale has taken extensive continuing education in orthodontics, restorative, and cosmetic dentistry. Additionally, in 2006 he completed a mini-residency at USC for the placement and restoration of implants. Dr. Doug Stilson also graduated from Loma Linda School of Dentistry where he then worked as a clinical instructor for the next 5 years. He has taught over 3,000 dentists to improve their clinical skills through hands on courses and has developed advanced abilities in extensive dental rehabilitation and full mouth reconstruction.
