

GRAND RAPIDS, MI, October 13, 2013 **/24-7PressRelease/** -- At Contemporary Family Dental, Grand Rapids, MI dentist patients have a caring dental provider on their sides: Dr. Bradley Dykstra.

Dr. Dykstra offers comprehensive dental services at his office that range from preventive care to cosmetic dentistry to cutting-edge procedures. In fact, Dr. Dykstra is an expert on dental technology, particularly in the use of digital radiography. He has spoken on this topic at a number of dental conferences, including at the Michigan Dental Association, New Orleans Dental Conference and 3rd District Society of New York.

Patients of Dr. Dykstra can see digital radiography or digital X-rays for themselves during a regular dental checkup at his Grand Rapids, MI dentist office. During these visits, a member of Dr. Dykstra's staff will take X-rays of your teeth that immediately show up on a computer screen for Dr. Dykstra to evaluate for signs of decay or damage. These digital images are then saved for future comparison at a patient's next dental appointment. Other services at this initial appointment include a dental cleaning and visual examination.

In addition to general dentistry services that keep teeth healthy from the inside out, Dr. Dykstra offers cosmetic dentistry services that highlight the outside of your teeth. While the services Dr. Dykstra offers are many, a few examples include tooth-colored fillings, veneers, teeth whitening and Invisalign to correct misaligned teeth.

Dr. Dykstra, a dentist in Grand Rapids, MI, also offers dental implants to replace lost or missing teeth. Dental implants involve implanting a metal tooth "root" to replace the missing tooth. He can then place an anchor known as an abutment plus a crown that matches seamlessly with your surrounding teeth.

"Dental implants can be a life-changing intervention for my patients," says Dr. Dykstra, a Grand Rapids, MI dentist. "Their stability and natural look and feel almost make them forget the implant is not their own tooth."

As a dentist in practice since 1978, Dr. Dykstra has watched as many innovations in the dental industry have made procedures faster and less painful for patients. One such example is the use of laser therapy in treating cavities, gummy smiles, whiten teeth or reduce dental sensitivity. Lasers can eradicate bacteria from a cavity, preventing the danger of further infection.

Contemporary Family Dental Offers Superior Dental Care For Patients In Grand Rapids

Written by Australian Business

"While technology has changed the services I am able to offer patients, one thing has remained the same: My commitment to helping Grand Rapids patients keep their teeth and gums healthy," says Dr. Dykstra, a dentist in Grand Rapids. "I'm proud to serve the community as their partner in care."
