

CHICAGO, IL, October 14, 2013 **/24-7PressRelease/** -- EnviroFry provides affordable, low-cost toxic mold removal and remediation for residences, offices, workplaces, and commercial buildings in metro Chicago, and nationwide United States, Philippines, Hong Kong, Thailand, plus Ontario and Quebec provinces of Canada.

Staffed by Professional Industrial Hygienists, Certified Environmental Hygienists, Certified Mold Inspectors, and Certified Mold Remediators, EnviroFry is an international company that has provided mold inspection, mold testing, and mold remediation through its leader, mold expert Phillip Fry, since 1999.

Visit the company websites <http://www.moldexpertconsultants.com>, <http://www.moldvictimrights.com>, <http://www.real-estate.ph>, <http://www.envirohongkong.com>, and <http://www.envirothai.com>. For free answers for mold questions and problems, USA and Canada property owners, managers, tenants, and mold victims can email Mr. Fry phil@moldinspector.com or phone toll-free 1-866-300-1616 in the USA and Canada, or call Phillip's cell phone number 1-480-310-7970 internationally.

For free advice for solving mold problems in the Philippines, Hong Kong, Thailand, or other Asian nations, contact Hank Taylor, who has over 25 years experience in mold investigation and mold removal in California, Philippines, Hong Kong, and Thailand.

Email Mr. Taylor at moldmen@att.net or phone Hank and Merley Taylor in the Philippines at 63-927-888-2113. Visit the Taylors' website <http://www.moldmen.com>.

Mold consultants Fry and Taylor have mastered the use of low-cost mold remediation techniques such as high output ozone gas treatment, fogging moldy areas with effective mold killers, high-capacity air scrubbers with large HEPA and activated carbon filters, HEPA vacuuming, and efficient removal and disposal of moldy building materials.

If a mold client's property has toxic mold growth hidden inside walls, ceilings, floors, and heating/cooling equipment and ducts, EnviroFry has even perfected how to find and kill mold effectively inside such areas without opening up or removing surface building materials such as drywall, plaster, and paneling.

Killing mold without opening up walls, ceilings, and floors is much lower in cost than the very invasive and labor-intensive removal of expensive surface building materials.

EnviroFry is staffed by Professional Industrial Hygienists, Certified Enviromental Hygienists, Certified Mold Inspectors, and Certified Mold Remediators, who serve property owners, managers, and tenants in metro Chicago, Illinois, nationwide USA, Philippines, Hong Kong, Thailand, and elsewhere in Asia.
