

LONE TREE, CO, October 30, 2013 **/24-7PressRelease/** -- Logic Integration announced today their partnership with INSPIRATIONField to enhance the audio visual communications and technology systems throughout the nonprofit's new state-of-the-art facility located in La Junta, Colo.

INSPIRATIONField recently completed work on a new 150,000 square foot facility after 35 years serving the Southeastern Colorado community at their previous location. The nonprofit serves approximately 200 children and adults with developmental disabilities in the tri-county area of Otero, Bent, and Crowley. The board of directors has been in existence since 1966 and was started by a small group of parents who wanted a place for their children to attend school and participate in a social environment.

Logic Integration was chosen to install the technology for INSPIRATIONField's new building, which includes a 200-person dining and commons area, executive boardroom, client conference room, training room and executive office. The installation team also enhanced the music therapy room, which includes a recording studio, as well as the home theater. Each space within the facility required unique AV applications, one of the reasons Logic Integration's experts were chosen for the project.

"Our experts wanted to match the level of high-quality care offered at INSPIRATIONField with high-quality AV technology and equipment," said Shawn Hansson, founder and CEO of Logic Integration. "It was a natural fit for us to work with this organization, whose values and mission align with ours at Logic. We're honored to support this community through such a unique and important project."

INSPIRATIONField's mission is to make a difference in the lives of people with developmental disabilities, working closely with families and friends to improve their patients' quality of living. To learn more about INSPIRATIONField, please visit: <http://www.inspirationfield.org>.

About Logic Integration

State-of-the-art technology that's easy-to-use.

Logic Integration designs and installs easy-to-operate audio visual systems in commercial and

residential facilities nationwide. The award-winning company has integrated systems for companies such as Comcast, Berkshire Hathaway, Sprint/Nextel and Qdoba Mexican Grill. Logic is one of ColoradoBiz's "Top Companies of the Year" and recently received the prestigious Creston Integration award for "Ultimate Connected Condo." Shawn Hansson, CEO and Founder, was named one of "Colorado's Top 25 Most Influential Young Professionals" in 2013 by ColoradoBiz. The company also won the "Best Showroom" and "Best Special Project - Silver Technical Design" award at the CEDIA Electronic Lifestyles Awards. Logic is dedicated to transforming a simple space into an experience for its users, conference room participants and entertainment enthusiasts. The company works with superior products to create AV systems that are vibrant, efficient and able to be controlled easily.
