

LANSING, MI, November 08, 2013 /**24-7PressRelease**/ -- The Affordable Rent-To-Own Company announces that individuals who finance home buyers can earn ten percent (10%) annual percentage rate of interest by providing long-term, fully-collateralized financing of rent-to-own, affordable homes.

Interested lenders can visit <http://www.affordablerenttoownhomes.com> to learn that financing a rent-to-own home purchase is safe, secure, and protected in three ways:

1. Each home loan is secured by being the only lien (mortgage) against the title or deed of the manufactured home or traditionally-built home.
2. Each loan is made directly to the Affordable Rent-To-Own Homes Company, which is the borrower that will make timely monthly payments directly to the lender in the USA, Canada, or worldwide, whether or not the company has collected the monthly rent-to-own rental payments from its rent-to-own home buyer.
3. Each rent-to-own home is in excellent condition, certified mold-safe, and low-priced, and thus easy to re-sell the home in the unlikely event that the company fails to make its timely payments to the lender.

For more information on the benefits of financing a rent-to-own home, or for help for professional and expert mold inspection, testing, and removal services nationwide, please phone Phillip Fry, Certified Environmental Hygienist, toll-free 1-866-300-1616 or Phillip's cell phone 1-480-310-7970, or email phil@moldinspector.com.

Today's high housing costs and the unavailability of mortgage money for many families (because of lenders' requirements for a big down payment and a high credit rating score) prevent many deserving families from enjoying the security and satisfaction of living in their own home rather than paying rent month after month, year after year.

The primary objective of the Affordable Rent-To-Own Home Company is to provide the important rent-to-own opportunity for financially-responsible individuals and families to buy a low-price, certified mold-safe, high quality manufactured home or traditionally-built home in the USA.

The Affordable Rent-To-Own Home Company Introduces High Interest for Lenders Who Finance Home Bu

Written by Australian Business

The Affordable Rent-To-Own Company offers high rates of interest to individual lenders who finance the purchase of rent-to-own manufactured homes and traditionally-built homes for responsible individuals and families who need rent-to-own financing to own a good quality home.
