

BEVERLY HILLS, CA, November 08, 2013 /24-7PressRelease/ -- [Beverly Hills cosmetic dentist](#), Dr. Parsa Zadeh, is offering free consultations for [Lumineers](#)

. Lumineers are a revolutionary type of dental veneer that can be used to restore smiles without the need for any invasive or uncomfortable procedures. Patients with chipped, worn, discolored and otherwise flawed teeth can enjoy a bright, healthy Hollywood smile.

Lumineers can be used to correct numerous cosmetic flaws. Dr. Zadeh, Beverly Hills dentist, recommends Lumineers to patients who have minor aesthetic concerns and who want an attractive restoration that lasts many years. They are made using Cerinate porcelain, which is a special type of porcelain that can be made incredibly thin. The design of Lumineers enables them to be bonded directly to the front of the tooth without the need for any of the preparation that is required by traditional dental veneers. With proper care, Lumineers can last up to two decades. The free consultation allows patients to meet Dr. Zadeh and learn more about how Lumineers can give them the smiles they crave so that they can look and feel their best. Dr. Zadeh may also be able to recommend alternatives for patients who are not candidates for Lumineers.

Other treatments are also available. Beverly Hills dentist, Dr. Zadeh, offers extensive cosmetic and restorative treatment options that include dental bonding, Lumineers, [Invisalign](#), porcelain veneers, smile makeovers, full mouth reconstructions and gummy smile surgeries. Treatments are carefully chosen and coordinated to help each patient meet his or her smile goals.

About Dr. Zadeh, [Dentist Beverly Hills](#)

Dr. Parsa Zadeh is a skilled Beverly Hills dentist who was named "America's Top Dentist" in 2008 by the Consumer Council of America. He has nearly three decades of experience practicing and teaching in his field. He is a Fellow of the Academy of General Dentistry and a Fellow of the International Academy of Oral Implantology. After graduating with honors from the College of Dental Surgery, Manipal, Dr. Zadeh completed his general practice residency and passed the dental boards among the top 2 percent of all candidates. He continued his advanced education in restorative dentistry and has lectured at USC Dental School's Department of Restorative Dentistry. Visit <http://www.zadehdentistry.com> for more information.
