JERSEY CITY, NJ, November 08, 2013 **/24-7PressRelease/** -- A change of scenery is always refreshing, and Drs. Paul Lustiger and Caroline Hamilton, dentists in Jersey City, are opening their doors at a new facility location. Dr. Lustiger's practice is two blocks west of his old location, so it's not too far of a move. His patients don't need to worry about the move because they can still receive the best general and cosmetic dentistry services in Jersey City and surrounding areas.

"I have been treating smiles for about 30 years, and I opened my own practice in Jersey City in 1992. This change in location will allow us to be more accessible to new patients, and our office offers updated technology including digital X-rays, nitrous oxide (laughing gas), intra-oral photography and televisions located in each operation room," asserted Dr. Lustiger, Jersey City dentist.

The new office location is easily accessible by bus, train, light rail and car. It's near the waterfront, so patients can enjoy the calming view. The scenery adds to the comfort and warmth of Dr. Lustiger's practice. In the Jersey City area, there are many dentists to choose from, but none can compare to Drs. Lustiger and Hamilton's expertise and full list of general and cosmetic services. With the new addition of Dr. Hamilton, Dr. Lustiger is putting together an efficient and caring dental team, so a new location was in order to accommodate new staff and patients.

Although they have moved locations, Drs. Lustiger and Hamilton still provide the same services. They are the first defense against tooth decay and gum disease. Initial cleanings and oral examinations identify any abnormalities near the anterior and posterior teeth.

As cosmetic dentists in Jersey City, Drs. Lustiger and Hamilton also treat teeth for restorative and cosmetic reasons. Some of their popular services include teeth whitening, root canal therapy, Invisalign, veneers and dental implants in Jersey City.

To schedule an appointment with Drs. Lustiger and Hamilton, call (201) 200-0500 or submit an appointment request form on Dr. Lustiger's website at [www.drlustiger.com](http://www.drlustiger.com). It's easy to schedule appointments via the website because Dr. Lustiger and his team supply important insurance information, location directions (via Google Maps) and new patient forms.

Dr. Lustiger utilizes his website to prepare patients for their first dental visit, and he wants to make it as smooth as possible. Drs. Lustiger and Hamilton and their team look forward to meeting new patients at their new facility. Patients will experience comfortable and quality
