PALM BEACH GARDENS, FL, November 08, 2013 /**24-7PressRelease**/ -- Millions of Americans deal with dental issues, and it's extremely stressful. Let go of those worries and contact Dr. Mark Civin, Palm Beach Gardens cosmetic dentist. It's essential for patients to visit their dentist to help prevent tooth and gum disease. Dr. Civin acts as the first defense against dental problems, and he also offers dental treatments for patients who need customized restorative dental care, such as dental implants. Besides dental treatments, Dr. Civin also offers facial rejuvenation.

"My patients appreciate that my practice focuses on cosmetic and restorative dentistry. My staff and I work toward making the best decisions for our patients, and I always restore smiles to their fullest potential. Some of my regular patients also deal with facial problems, so I am happy to provide facial rejuvenation services to fulfill their needs," said Dr. Mark Civin, cosmetic dentist in Palm Beach Gardens.

When a patient's oral health is declining, it's important to contact Dr. Civin to find ways to treat it. Tooth loss is one of the biggest problems many Americans experience, and Dr. Civin believes dental implants are the best way to go. Implants boast long-lasting results, and Dr. Civin remarks on other key advantages.

"Dental implants mimic the feel and look of natural teeth, so no one will know you have a synthetic tooth. A screw, which acts like a tooth root, stabilizes an implant. Cavities don't affect a dental implant. Plus, my patients love how well dental implants have improved their speech and esthetic look," said Dr. Civin, dental implants in Palm Beach Gardens.

It's a fact of life-people age and experience stress, but a fact people don't want to acknowledge is that aging and stress can cause skin to appear older. Skin may look wrinkled or dull. It's not the end of the road. Dr. Civin recommends facial rejuvenation as one of the best treatment options for facial skin care. At Dr. Civin's office, patients can get dermal filler procedures and skin peels. Facial rejuvenation in Palm Beach Gardens can give patients younger and brighter looking skin.

Dr. Civin's private practice focuses on dental restoration, cosmetic dentistry and dental implants, so patients near the Palm Beach Gardens area should contact Dr. Civin's office about restoring their smiles. With over 30 years of dental experience, Dr. Civin promises the best quality dental care and relaxing environment. To schedule an appointment with Dr. Civin, call (561) 624-2224 or set up an appointment via Dr. Civin's website at [www.civinsmiles.com](http://www.civinsmiles.com). The website is a great way for new patients to meet Dr. Civin and his staff. Plus, important new patient information can be accessed online. Don't let dental and facial issues get you down.
