

Bypass iCloud Activation On iPhone 5S/5C/5/4S/4 Any iOS Permanent Remove Activation

Written by Australian Business

NEW YORK, NY, May 10, 2014 /24-7PressRelease/ -- Yesterday we told you about BestUnlockiPhone.com , a website that offers ByPass/Remove Icloud Activation for iPhone 5S/5C/5/4S/4/3GS on any iOS. A lot of people have been speculating on how this service actually works. The most discussed potential way works was that somehow they have access to apple database.

iCloud iPhone Activation Team Official website: www.BestUnlockiPhone.com BestUnlockiPhone.com was formed in mid 2013 and have successfully Activated over 250,000 iPhones worldwide. This is unparalleled by any other service in the industry. They have achieved this by combining a very simple solution with a fantastic customer service department that is available 24/7 through many forms of contact. From Today you will be able to Bypass and Activate Any iPhone and Any iOS world wide no problem.

This is not how services like BestUnlockiPhone.com work. We actually wrote about the way an official iPhone activation works last year, but I guess it's time to refresh everybody's memory...

How can an iPhone be activate?

First, in order to be officially and permanently activated, your iPhone IMEI (your iPhone fingerprints) has to be added to Apple's database of activated iPhones. For example, if you live in France where you can buy an iPhone from a network of the official carriers, this carrier will send your IMEI to Apple, which will add it to its database of whitelisted/unlocked iPhones and the iPhone needs iCloud activation, but you don't have the e-mail and password of the iCloud, BestUnlockiPhone.com can remove the iCloud Activation.

Once added to the database, you need to sync your iPhone in iTunes. By communicating with Apple, iTunes will see that your device is whitelisted and will remove the lock on your iPhone, for good.

How can a site like www.BestUnlockiPhone.com remove the iCloud Activation from your iPhone?

No, BestUnlockiPhone.com didn't hack into Apple's database. They're activate iPhones in a complete legality method.

For example, the guys at BestUnlockiPhone.com may know someone (and most likely pay him a lot of money) that works for all carriers that offers the remove iCloud Activation for iPhones. The accomplice is sent a few IMEIs to add to Apple's database on behalf of a company and voila, a bunch of iPhones have been permanently activated.
