

MINSK, BELARUS, August 21, 2014 **/24-7PressRelease/** -- Amasty - a well-known Magento extensions developer - acquired another Magento extensions company - Mageplace. This acquisition includes the purchase of all Mageplace extensions, its website and social networks.

Mageplace is a Magento extensions producer with a long history and almost 30 high quality extensions popular among eCommerce community. Besides, it was a Magento Bronze Partner , which also helps to understand its status. Initially Mageplace was created as a part of Belarusian software company Belitsoft.

As far as Amasty is concerned, it occupies one of the leading positions on the market of Magento solutions. Its store includes 100+ Magento extensions and Amasty Team includes a few Magento certified developers.

After the acquisition of Mageplace all its extensions will be reissued under Amasty brand and can be found at <http://amasty.com/magento-extensions.html> . All Mageplace customers will be put to Amasty support program. Besides, the refund period for these extensions will be increased to 30 days and the price for Enterprise version will be significantly discounted.

At the moment the following extension created by Mageplace are issued under Amasty logo:

- Survey - Magento extension designed to conduct surveys of any type for better target audience research.
- Facebook Like to Download - This Magento extension suggest an easy way to increase your SMM results. Let your customers download your e-book, infographics or a catalogue with exclusive goods for liking your Company on Facebook.
- Hide Price - Hide Price suits well for sophisticated marketing strategy. If you want to hide prices from some groups of customers or simply not show prices for the products that are out of stock, going for this Magento extension is the best solution.
- Inventory Management - With Inventory Management you will significantly reduce the time

required to keep the information at your store up-to-date. It supports .csv files allows bulk actions.

- Cloud Backup - If you want to be sure that the data at your Magento store are protected from loss, you wouldn't do without Cloud Backup. It supports all major cloud storages and backs up all you need in the most convenient way.

- SugarCRM Bridge - This extension would be a great choice for those, who run both online and offline store. SugarCRM Bridge helps to make cooperation of Magento and SugarCRM as efficient as possible.

Acquisition of Mageplace is advantageous for both companies and helps to bring Magento community to the new level.

[Amasty](#) is a Magento extensions provider that specializes in the effective e-Commerce solutions. The Company develops its modules in accordance with the highest quality standards. This lets Amasty supply Magento community with easy-to-install products, timely support and advanced solutions.
