

CHICAGO, IL, August 23, 2014 **/24-7PressRelease/** -- For the second consecutive year, Q1 Productions will host the Innovations in Clinical Data Management Conference, bringing the most valuable information in the pharmaceutical and medical device industries to clinical data managers of small, medium, and large sized companies. The conference will be held October 27-28, 2014 in Arlington, Virginia.

Based on requests from past attendees, the conference format will once again include ample time for small group discussion to further delve into a variety of issues surrounding the clinical data management space. In-depth sessions and panel discussions will be led by some of the biggest names in the pharmaceutical and medical device industries including Jason Raines of Alcon Laboratories, Inc., Mariam Mirgoli of Gilead Sciences, and Michael Goedde of Medimmune. A wide variety of topics will be presented, such as implementing cloud-based systems and mobile clinical trial applications, analysis of the electronic data capture technologies, implementing the Clinical Data Interchange Consortium's newest standard for SDTM and exploring real world data utilization.

This year, each presentation will be reviewed by an Advisory Board to ensure that all topics address the most top-of-mind challenges and latest updates within the industry. Raines will be joined by Melissa Binz of Pfizer on the Advisory Board.

About the Organizer Q1 Productions designs and develops webinars, training courses, conference programs and forums aimed at specifically targeted audiences throughout highly regulated industries in order to provide strategic learning and timely program content. Through a highly structured production process focused on research calls with end-users and key stakeholders in the industry, our team is able to understand the immediate business concerns of today's leading executives. Whether focusing on new or pending legislative and health policy issues or enhanced technologies or processes that will drive efficiency, our programs provide solutions to the urgent educational and information needs of our attendees.
