

Real Estate Photographer in Tampa Discusses Ground Level Use of Drones

Written by Australian Business

TAMPA, FL, August 26, 2014 **/24-7PressRelease/** -- Our Tampa Real Estate Photographers now employ the use of drones for stunning ground level and inside of home fluid movement shots. Although we do, do some aerial videos and photography we do that for fun and do not charge for aerial photography. Take a look for yourself at this stunning video of Clearwater Beach, Florida.

The Return on Investment from paying a professional photographer, allows you to get top dollar for your property which will easily pay, many times over, the nominal cost for our services. Another advantage to professional pictures is your rankings on Google and other search engines. Your listings will have a high search engine ranking with high quality photography, thus giving you more exposure that will help to promote the property. With the right lenses, our Real Estate Photographers can show the openness of an area, yet without making it look fake.

We provide Aerial Photography as well for free, which not only shows the property itself but can beautifully show the area around your property. To be able to view that landscape from the air gives such a stunning look to your property. If your property may not be spectacular, but the area which it is in is great, than you want to really show the area, and the best way to do that is by Aerial Photography. We use a Quadcopter Drone, which is very safe and light weight (under 3 lbs). Due to the versatility of our drones, we shoot very smooth ground level video such as, flying toward your home from the street, or even down the street to show the neighborhood. For larger rooms we can also fly inside the house, for a very smooth cinematic video. The dynamic of movement really gives the buyer a sense that, they have been inside the property.

We are also very active with social media, You Tube, Pinterest, Facebook, Instagram, Vimeo, etc. We will upload your property to you tube that allows you to attach it to your listings, your websites, as even to your own emails.

We use very expensive low light lenses that will brighten rooms without any grain in the picture. A professional Real Estate Photographer will know how to use lighting and exposure to demonstrates the pleasing Architecture of the building.

Our rates our for Hillsborough and Pinellas Counties. We also do other Florida Counties with a nominal travel charge. Feel free to ask us any questions by email or the contact form below and we will respond promptly. We look forward to helping you get the most of your property. Our regular video shoot includes 30 minutes of shooting inside and outside of your property. Our Aerial Services include an hour of service.

A word about Internet ready photos. On a website, a lower resolution photo will actually look sharper than a higher resolution photo. On a high resolution photo, a website had to compress the picture thus, losing its sharpness, so therefore, it is better to use low resolution for internet. All the pictures you see on this page are low resolution photos taken from the video. The pictures will look sharp and clear, but you want a pixel size of about 600x900. However if you are using the picture for prints, for a large brochure, than you do want to use a high resolution photos.

We would be happy to serve your Aerial Photography and/or Tampa Real Estate Photography needs.

Celebrations of Tampa Bay has provide Video and Photography Services in Tampa Bay since 1994.
