

## New Image Plastic Surgery Associates Now Offering ThermiTight

Written by Australian Business

---

WASHINGTON, DC, November 19, 2014 **/24-7PressRelease/** -- Washington D.C. plastic surgeon, Dr. Roberta L. Gartside, is thrilled to announce she is now offering ThermiTight to better serve her plastic surgery patients. Dr. Gartside is the founder of New Image Plastic Surgery Associates.

ThermiTight distributes gentle controlled thermal energy under the skin. It is a great solution for patients that want a safe, effective non-invasive solution to reserve the signs of aging. The procedure is painless and can usually be done in the office in under 2 hours.

"I am excited to be able to start offering this procedure to my patients," said Washington D.C. plastic surgeon Dr. Gartside. "It fills that gap between not being able to offer a solution to having to wait until one is ready for surgery. It may also be an ideal solution for some men in whom a facelift would not be a reasonable treatment because of haircuts and scar placement."

ThermiTight results can last for several years. It is a great, non-surgical solution for problem areas of the face, arms, thighs neck, and tummy.

Dr. Gartside and her skilled team serve areas in and surrounding Virginia and Washington, DC, including Reston, Fairfax and McLean. Dr. Gartside is an expert, board certified plastic surgeon in the Virginia and Washington, D.C. area. She offers a wide variety of cosmetic surgery treatments including:

- Breast augmentation- Facelifts- Botox- Liposuction- Body contouring- Breast lifts- Tummy tucks- Eyelid surgery

To learn more about ThermiTight, or to schedule a complimentary consultation with an experienced plastic surgeon, please call the office at (888) 730-4113, or fill out a convenient online form on the New Image Plastic Surgery Associates website.
